

How To Create 3 Different Softwares That You Can Submit For Massive Backlinks

Cheat Sheet

Software #1 – Browser Toolbar

How To *Create* Your Browser Toolbar

Step 1: Go to <http://www.conduit.com/>. Conduit.com is a site that allows web publishers (like you and me) to create browser toolbars to facilitate the ease of communication between the publisher and your readers.

Step 2: Click on the “Get Started Now” button and start creating your account.

Sign Up for Your Community Toolbar

Fill in the information below to create your own community toolbar in seconds.

Your name:

Your e-mail address: *

Name your community toolbar: * [?]

Enter a password: * [?]

Retype the password: *

With a little information about your website, we can help customize your toolbar.

Your website's URL:

Your website's category:

Language: [?]

Send me occasional e-mails from Conduit on how to get the most out of my toolbar [?]

I agree to the terms and conditions of the [Publisher Agreement](#)

How did you hear about us?

Type the characters you see in the picture:
(not case-sensitive)

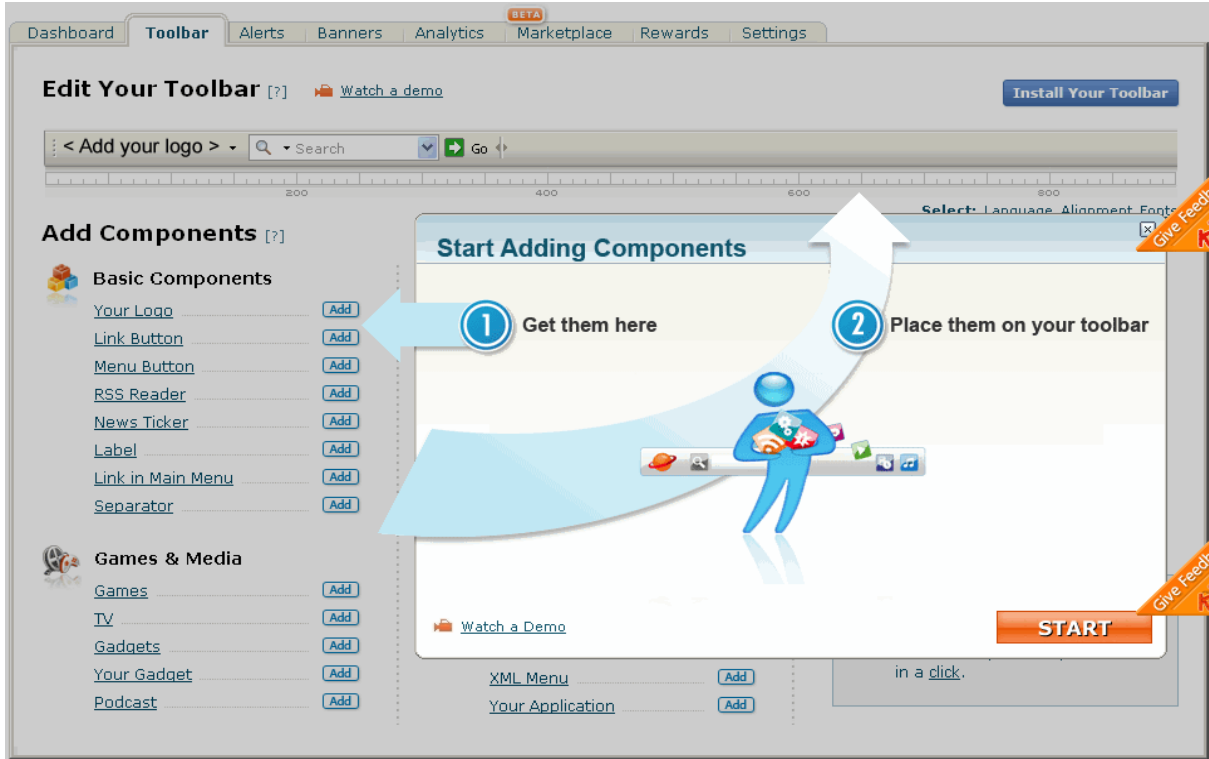

* Required information

Conduit | [Contact Us](#) | [About Us](#) | [Site Map](#) | [Privacy](#) | [Legal](#)

©Conduit 2009.

Step 3: Upon successful creation of your account, you'll be brought to the interface that allows you to start adding the various components to your toolbar.

Step 4: Below is a toolbar I created for my site "Rank Booster X". You can easily create your toolbar in less than 10 minutes. Next, visit your "Toolbar's Download Page".

Step 5: Click and save the .exe file to your desktop. You would need to host this file on your own server

Congratulations, you have created your first software!

Download Toolbar
(installs in seconds)

Includes Uninstaller

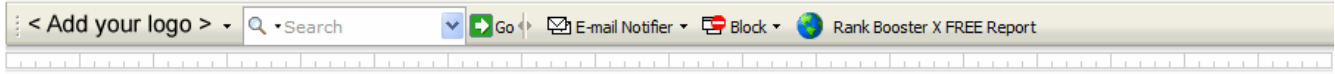

System Requirements
Windows Vista/XP/2000

Other versions:
[Firefox](#)
[Safari](#)

[Privacy](#)

NOTE: Upon successful creation of your software, please do 2 images captures:

1. Screenshot of your software

2. Icon image of your software

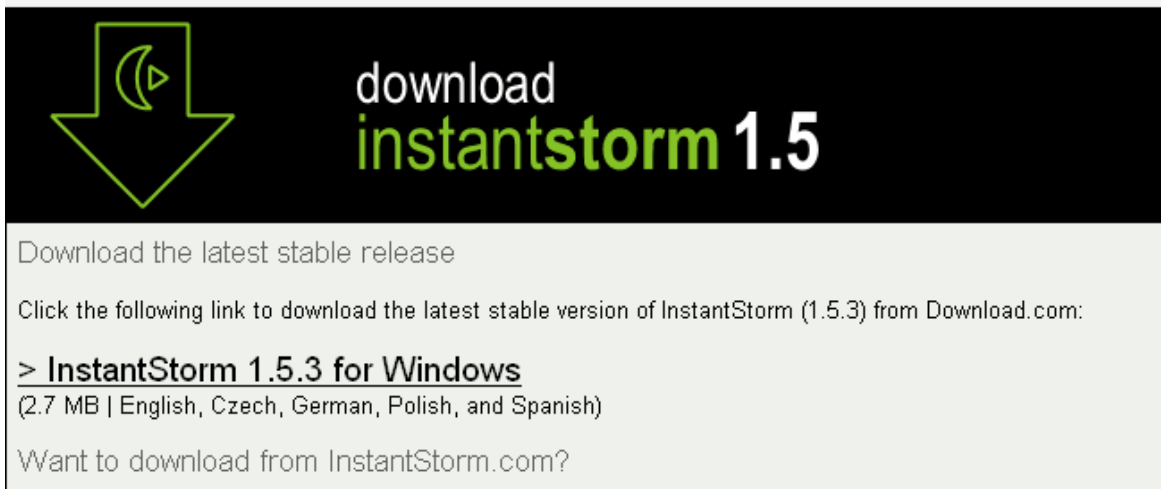

You can download a FREE Screen capture software at

http://download.cnet.com/ScreenHunter-Free/3000-2192_4-10063246.html?tag=mnco

Software #2 – Screensaver

How To *Create* A Screensaver

Step 1: Go to <http://www.instantstorm.com/download> and download your FREE copy of this screensaver creator. Instantstorm basically turns a swf file (*flash file*) into a sceensaver. So the next software you need to download is a flash file creator.

Download the latest stable release

Click the following link to download the latest stable version of InstantStorm (1.5.3) from Download.com:

> InstantStorm 1.5.3 for Windows
(2.7 MB | English, Czech, German, Polish, and Spanish)

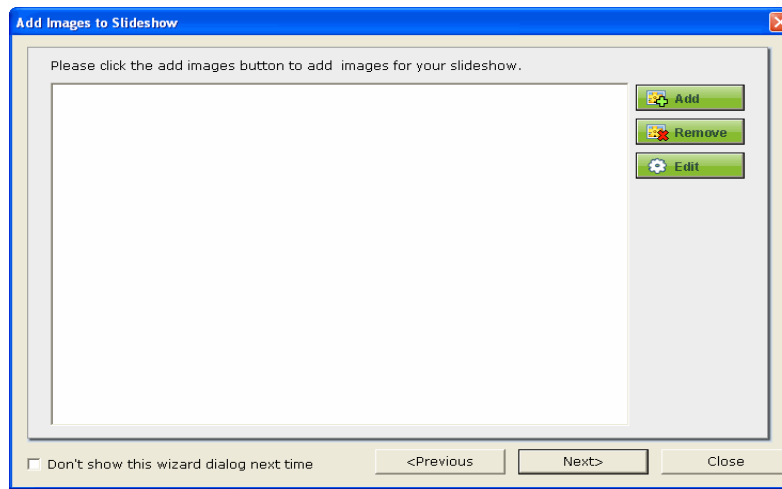

Want to download from InstantStorm.com?

Step 2: Download a flash file creator. You can grab Flash Slideshow Maker 4.88 which is a freeware to create your flash file. Download link is at http://download.cnet.com/Flash-Slideshow-Maker/3000-6676_4-10541568.html

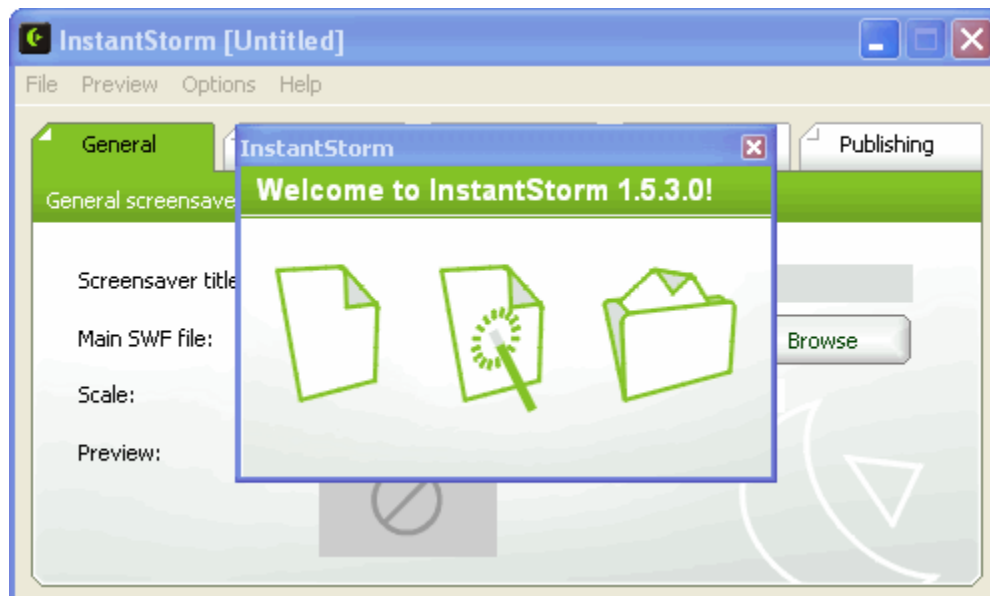

Step 3: You need royalty free images to create your screensaver. You can easily access such images at <http://www.sxc.hu>. **Please only use images that have no restrictions.** And you probably need to resize the images as well, you can use GIMP, a free image editor to do the job - <http://www.gimp.org/windows/>

Step 4: Start Flash Slideshow Maker 4.88 program. Follow the step-by-step wizard to create your flash slideshow.

Step 5: Start InstantStorm, select to create a *New Project with New Project Wizard*. Follow the step-by-step wizard to create your first screensaver.

Software #3 – An eBook in .exe format

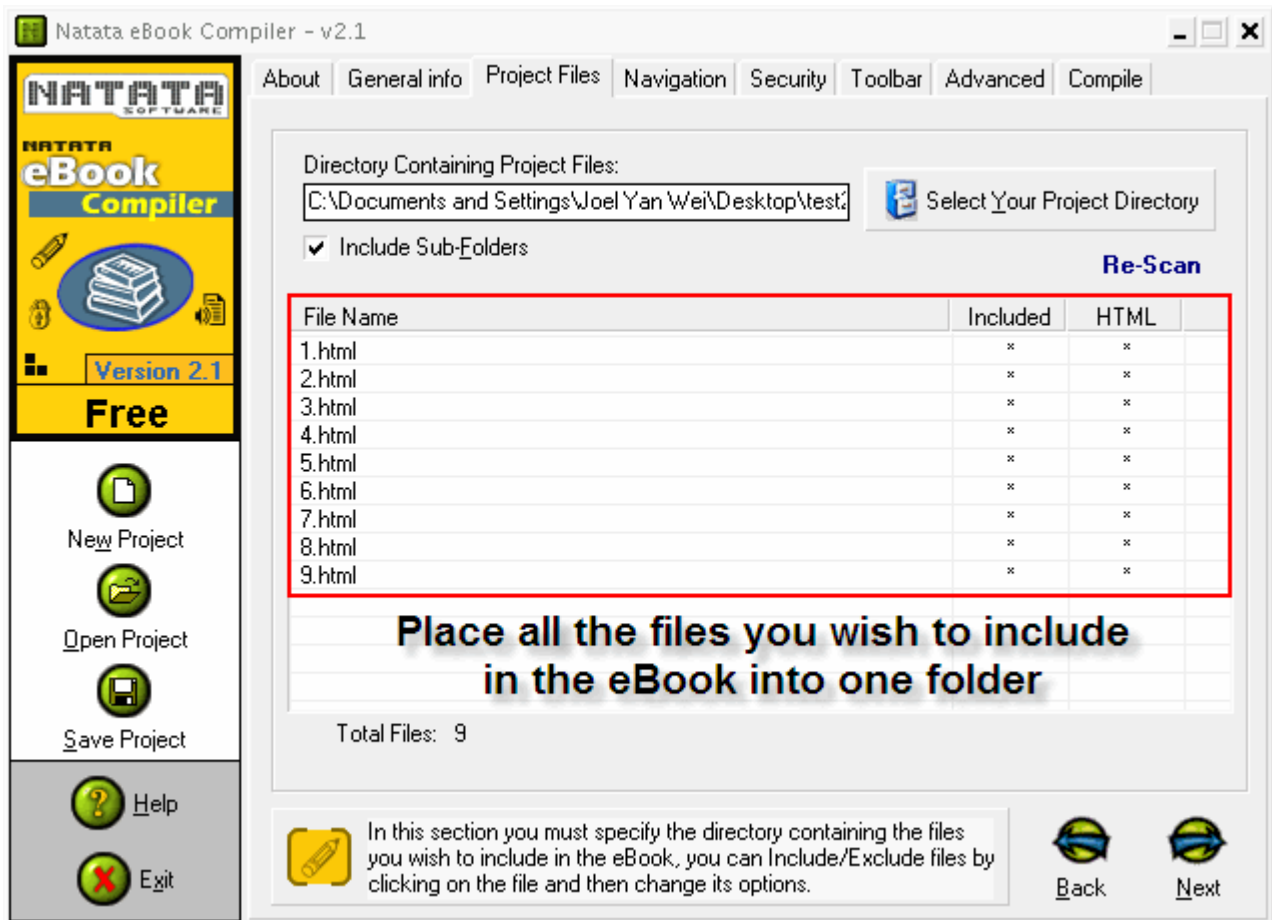

How To Create An eBook In .exe Format

Step 1: Go to http://download.cnet.com/NATATA-eBook-Compiler/3000-2069_4-10169371.html and download NATATA eBook Compiler 2.1. It is a FREE software that converts your HTML files into an executable file instead of a PDF.

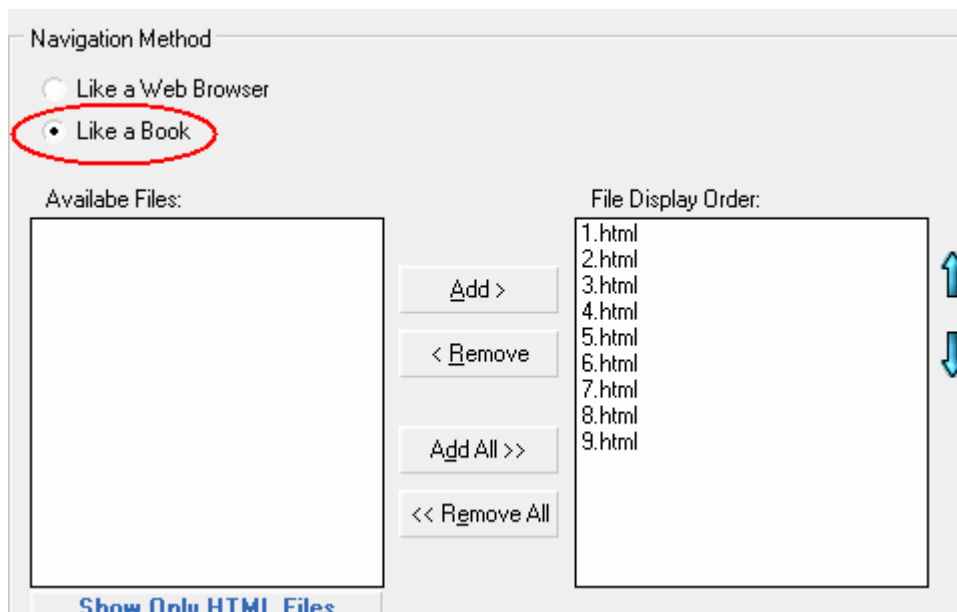

Note: The FREE version allows you to create executable exe files from HTML, wav, gif, jpeg, javascript and DHTML file types. However, it doesn't support Flash, Word docs or PDF files (only its PRO version does)

Step 2: To create your eBook in exe file format, simply follow the steps. Place all the files you wish to include in the eBook into one folder.

Step 3: Select the navigation method to be "Like a Book".

Note: The remaining steps are straightforward. Follow them to the tee and you will have created your first eBook in .exe format.
